Side Bacon, machine sliced, lb.....	43c		

All cuts of Fresh Meat, Sausage, Bologna, etc., down in price to help out your cost of living. **We will do our share in selling. You do your share in buying.**

**CHAMPION MEAT MARKET.**

### OBITUARY

#### MARTIN GEORGE CLEVER

Martin George Clever, 83 years old, of 230 West Hellman avenue, Monterey Park, passed away Tuesday. He was a native of Pennsylvania and had resided in Monterey Park for seven years.

He was a Civil War veteran and a member of the G. A. R. He enlisted during the Civil War with Company M, Fourth Pennsylvania Volunteers, and served under Colonel S. B. M. Young. He was a member of the Modern Woodmen of America. He and Mrs. Clever recently celebrated their sixty-third wedding anniversary.

He is survived by his widow, Mrs. Barbara Clever; two sons, Martin Clever of Calgary, Can., and H. J. Clever of Van Nuys; two daughters, Mrs. Mary E. Wright of Reseda and Mrs. Emma S. Dils of Alhambra and 14 grandchildren, 14 great grandchildren, and one great-grand child, five years of age. All of his children were present at his funeral, and all his grandchildren except Fred Clever. Six of his grandsons acted as pall bearers.

Mr. Clever's grandfather and his father were both born in eastern Penna. and later emigrated west by ox team across the Cumberland mountains to west Penna. near Pittsburgh. Mr. Clever's father at that time was ten years of age. When Mr. Clever's father grew to manhood and married he settled on a part of his father's farm where the Mr. Clever the deceased was born, in a log house hewn from the timber on the farm. He grew to manhood on this farm and married Barbara Seft and commenced housekeeping in the home formerly occupied by his father, where Martin G. Clever of Calgary Alta. was born in 1868. Then in 1871 Mr. Clever emigrated from there to Warren County, Iowa, where he purchased land and built a shack 14x18 and small stable for two horses and on this farm he continued to live for fifty two years, then rented the old farm and moved to Los Angeles, Calif., where he resided his remaining days. He was afflicted with diabetes for the past seven years, gradually becoming weaker, and having spent the last eleven months of his life confined to his bed. Funeral services were held at 2 p.m. on Nov. 24th, at the funeral parlors of F. A. Utter & son Alhambra, Calif.

They will never know you in a new pair of Hystopel shoes, at the Elks masquerade ball, Friday Dec. 5th. —Campbell's.

Christmas greeting cards—Get yours while the stock is complete.—Champion Pharmacy.

### High School Notes

The literary society held its first meeting on Friday Nov. 21st in the United church.

The meeting was opened by the singing of O Canada. The minutes were read by Gretchen McNaughton and accepted. The program was opened by a violin and piano duet by Martin Bollenburg and Max Caldwell. Elsie McLean entertained the audience with a piano solo. The playette "The Kept-ins" was heartily accepted but it is to be hoped the students don't follow their example. The program was closed by the reading of the light of the literary society by the editor, Harry McNaughton. Harry will be a poet someday if his paper was entirely original.

The meeting was closed by the singing of "God Save The King."

Come to the next meeting and see for yourself how much fun we have.

The next meeting of the literary society will be on December 19. Everybody come.

### Ladies' Aid Bazaar Well Patronized

The Ladies' Aid held their annual bazaar on Saturday Nov. 22nd in the Community hall. The Rev. Dawson opened the bazaar at 2.30. The ladies in charge of the various booths were as follows:

Fancy Work convener—Mrs. Moffatt assisted by Mrs. Clever. Apron Convener—Mrs. U. G. Anderson, assisted by Mrs. Freeze. Pillow Cases Convener—Mrs. Wise, assisted by Mrs. Ulrich. Tea Tables Convener—Mrs. D. Watkinson assisted by Mrs. Laiff. Fish Pond Convener—Mrs. Bond, assisted by Mrs. G. Campbell. Candy Convener—Mrs. F. Caldwell, assisted by Mrs. McInyre. Home Produce Convener—Mrs. Geo. Orr, Mrs. Starr.

The Mission Ladies' also had a booth.

Net proceeds: \$242.75. While greater receipts have been secured in other years the ladies are satisfied that with existing conditions they achieved a triumph, while the public was more than satisfied with the purchases made. The tea served was well patronized.

### Elks Sponsor Big Masquerade Ball

Remember the grand masquerade ball under the auspices of the Elks' Lodge on Friday, Dec. 5th. The funds secured will be devoted to the kiddies' Xmas fund, so in addition to having an extra good time and winning a costume prize you will be contributing to a very worthy fund.

Through an oversight mention of the Elks' social evening and dance on Tuesday of last week was omitted. This was one of the big events of the season, and while bad roads interfered somewhat with the attendance of outside lodges the turnout was highly satisfactory. Barons, Carmanagay and Valour contributed visitors and the local Elks were present in large numbers and everyone bent on the good time which resulted. A feature of the lunch served was the use of moose meat, which was very highly appreciated by everyone.

Mr. and Mrs. A. H. Anderson were here during the week on a visit to Mr. and Mrs. J. Anderson.

## NOTES AND COMMENT.

"Put not your trust in princes," could now be extended to politicians and their various expedients for helping out in the present stringency. There has been an extraordinary movement in the direction of relief works for the present winter, but even this will have a reaction in the way of less work during the coming summer and any relief furnished is naturally temporary. On the whole individuals must work out their own salvation and present indications are that this will require all the stamina and fortitude available. Prices may be relied upon to adjust themselves both in regard to agricultural products and manufactured goods as time goes on but there is every reason to anticipate a considerable period in which many difficult situations must be met. Ultimately the country will survive but it will not be on account of extra expenditures secured by prosperity clubs and other such organizations. Everyone endeavoring to meet their obligations as far as possible and avoiding unnecessary commitments for the near future must finally be relied upon to solve the difficulties at present presenting themselves.

It now develops that the mayor of the town tipped over his own outbuilding on Halloween night. Was this fair or dignified on the part of a town official? If the "boys" were entitled to have a night of license, why spoil their sport by doing the very thing the boys expected to do? On the same principle the members of the council should move all the implements to the front street on the basis that they could do it more carefully and with less damage than the celebrants to follow. When the mayor found it necessary to protect his property, why not strike him that his position entitled him to look after other people's interests in this direction? Another year he should go to the rink and pull the bricks off the chimneys and fill the gutters with them. He could do it to better advantage than the boys and save bricks, and it must be admitted that the town should look after town property, even if the individual property owner is not protected. The "boys" who do most of the damage are too old to be protected by town officials or anyone else. The work they do on Halloween night is a disgrace to everyone concerned, including the individuals who stand for them. There was a day when the streets were cluttered with implements of one kind and another for days. With the growth of civilization prompt measures have been taken to remove the debris after the Halloween celebration at the expense of the ratepayers. The actual damage to property was least \$100. If this is fun the mayor of the town should be the last man to protect his property, while ignoring that of other people.

The amount of free publicity that is being solicited by organizations of one kind and another has grown steadily until it is a decided nuisance. There may be reason for the local paper to support certain home industries but when it comes to big concerns that charge plenty for everything they sell and demand their pound of flesh to the limit, their request for free space does not seem to appeal to the average editor. Still they get some of the matter by and while they may waste some money in postage the returns are evidently satisfactory, to judge by the persistency with which papers are bombarded with it.

Included in this winter's program of the Alberta University radio station, CKUA, are five lectures to be delivered by members of the provincial de-

partment of field crops. The subject of these lectures is "Getting Ready for the World's Grain Show," and it is proposed to emphasize certain things necessary in the preparation of exhibits.

With one automobile for every 32 people, Canada now holds second place among the nations in the per capita ownership of motor cars, according to a recent survey, and third place in production. Uncle Sam's record is one automobile to every 4.6 persons whereas that of the Dominion is one to every 8.2 people. The United States manufactured 5,358,414 cars in 1929, England claims fourth place having had an output of 238,805 in 1929. Germany has 70,600. The number of cars scrapped or withdrawn from use in Canada in 1929 was 57,162.

# Better Times Than Ever Loom Just Ahead If Experience Of History Can Be Relied Upon

A "cheer up" cry, with reasons for it, which are as applicable today as when they were written, appears in an article by Macaulay, contributed to "The Edinburgh Review" of January, 1850. He points out that in almost every part of the annals of mankind, the industry of the people struggling against wars, taxes, famines, conflagrations, mischievous prohibitions, creates faster than governments can squander, and repairs whatever invaders can destroy.

The time in which the historian state was admittedly one of great distress, and he adds: "If we were to prophesy that in the year 1900 a population of 50,000,000, better fed, clad and lodged than the English of our time, will cover these islands—that cultivation, rich as that of a flower garden, will be carried up to the very tops of Ben Nevis and Helvellyn—that machines, constructed on principles which have never been, will be in every house—that there will be no highways but railroads, no travelling but by steam—that, vast as it seems to us, will appear to our great grand-children a trifling encumbrance, which might easily be paid off in a year or two—many people would think us insane." Such a prophecy, if made, would have been a source of astonishment to the mark. The population of the British Isles is a little less than 50,000,000, but the people are undoubtedly better fed, clad, and lodged than they were a century ago, and the debt of those days would be considered a trifle now.

But the historian wisely disclaimed any intention to prophesy, and made his appeal to the general principles of history. To almost all men, he says, the state of things in which they have been used to live seems to be the nearest to the things, and though, in every age, everybody knows that up to his time progressive improvement has been taking place, nobody seems to reckon on any improvement during the next generation. It cannot be absolutely proved that history is an error who say that society has reached the turning point, that the best days have been seen, and that all who came before us with just as much apparent reason. "On what principle is it that if we see nothing but improvement behind us, we are to expect nothing but deterioration before us?" Macaulay declares that rulers will best provide for the improvement of the people by strictly confining themselves to their own legitimate duties by leaving capital to find its most lucrative course, commodities their fair price, industry and intelligence their natural reward, illness and folly their natural punishment, by maintaining peace, by defending property, by diminishing the price of law and by observing strict economy in the government of the state. "Let the government do this, the people will prosper in the end."

The situation today is not new. The world has periodically contended with similar or worse conditions, but has emerged more progressive and prosperous than before. Macaulay's appeal to the history of mankind supplies reasons for confidence in the future.—Toronto Mail and Empire.

## Dates Back Many Years

Prince Edward Islanders Started Fox Farming In 1878

"Summer visitors to Prince Edward Island have observed that fox pens are almost as numerous in the province as hen houses are on farms in the United States," says the New York Sun, which points out that business dates back to 1878 when pioneer breeders near Tignish started with a score of foxes captured in the woods. "The original 20 were the Adams and Eves of this flourishing industry. In 1899 the Canadian National Fox Breeders' Association registered 70,833 newborn cubs, all descended from the original group."

"Why do you bother to paint pictures? There are many animals of them to be bought."—Der Whore Jakob, Berlin.

W. N. T. 1865

## Grading Canadian Poultry

Agreement Reached With Buyers Means High To Farmers

Growing out of a series of conferences held in Toronto between representatives of the leading wholesale buyers of poultry and officials of the Dominion Department of Agriculture, Hon. Robert Weir, minister of the department, announced an agreement had been reached on the part of the buyers to recognize Government grades as the standard for trading, and the establishment of substantial price differentials between classes and grades.

"The agreement marks one of the most important developments in the poultry industry in many years," says a statement issued by the agricultural department. The statement continues:

"Just what this announcement means to the farmers of Canada is indicated by the fact that through the simple process of crate feeding and properly finishing poultry for market from 50 to 70 cents in market value may be added to the individual bird. With some 15,000,000 birds produced each year, this two or three months this means the possibility of increased cash returns to farmers of from \$5,000,000 to \$7,500,000.

Canada's poultry season extends roughly from Oct. 20 to the New Year. During that time approximately 15,000,000 chickens and other fowl will be marketed in this country in addition to the turkeys, geese, ducks, etc. The average weight of the chickens will be about four pounds.

All poultry will be divided into two main grades, "milk-fed" and "selected." "Milk-fed" does not necessarily mean that the birds get milk to drink. It means that they have been crate fed until their muscles have been softened and the fat takes on a milk-white color. The selected are range fed with more athletic muscles.

The two grades will be sub-divided into several classes and the buyers will pay a differential of 4 cents a pound in favor of the milk-fed class. It will mean that the farmer who "milks" his poultry, that is, crate-feeds them, will get a substantial premium over the one who lets his stock run at large. With the present price of feed, it is estimated that crate feeding will be a profitable undertaking.

## Vancouver Harbor

Expect To Handle 150,000,000 Bushels Of Wheat This Winter

The Vancouver Harbor may be called upon this winter to handle about 150,000,000 bushels of wheat and the Commissioners state that the port is capable of doing this. The chairman of the board, Mr. J. H. McCall, is quoted as saying: "We have nearly 14,500,000 bushels elevator capacity now, with an additional 2,000,000 bushels coming in about November 19th, and we can find ways and means of storing everything that comes to us."

## Canada's Clay Resources

In addition to many other types of clays Canada has immense resources of clays and shales suitable for the manufacture of building brick, and structural and drain tiles.

2921

THE COWL, NECKLINE TERMINATES IN SCALF Here's a marvelous dress for Autumn for town wear. And best of all, it's a stunning dress for later that will easily slip under a Winter Coat.

The curved seaming reduces any bulk about the hips. The bolero bodice is cut on very becoming lines. It is given an entirely new aspect through the use of a line that ends in a scarf at the back. It is a sweet printed silk in rich dark brown tones with beige contrast in plain crepe.

Size 36 requires 3 1/2 yds 54-inch with 3/4 yard 30-inch contrasting. Send 50 cents (in stamps or coin) to Fashion Bureau. Write carefully for pattern, your name and full address, the number of the pattern and the size you want.

of business cycles, water-power development continues to force rapidly.

Since 1910 Canada's water-power installation has risen from less than 1,000,000 to nearly 6,000,000 horsepower. The record of growth has been a marvel of persistency. During the past twenty years, water-power

## DEAN OF C.P.R. CONDUCTORS

## Charles H. S. Henderson, Train

conductor operating on the Canadian Pacific Railway run between St. Stephen and Edmundston, N.B., lays claim to the distinction of having been the youngest train conductor on any railway and of being today the oldest of any in active service. In 1878, at the age of barely seventeen, he was conductor on the New Brunswick Railway between above points and he continued in the same capacity until 1883 when he had uninterrupted charge of regular scheduled trains with the exception of a short term as Train Master. He has held under his care at various times three presidents of the Canadian Pacific Railway—Sir W. C. Van Horne, who said of him, "You're some man, Henderson"—Baron Shaughnessy, who described him as "a very careful and efficient man"—and E. W. Beatty, of whose special train touring the Maritime Provinces last year he was conductor. Mr. Beatty congratulated him on his many years of service and introduced him to Sir Herbert Holt who said he had the most wonderful record of the system. This year Mr. Henderson was conductor of the vice regal train carrying Lady Wellington and suite from St. Edmundton to St. Andrews. As above illustration shows, he is still in full possession of the vigor and vigor of a man many years younger.

## A New Definition

Scottish Minister Urges Idea Of What "Calgary" Means

The friendly controversy which for years has raged over the name of the city of Calgary is expected to break out afresh with the arrival from Scotland of a new Gaelic definition of the word "Calgary." For years it has been generally accepted that the Calgary name "clear running water." Now comes word from Rev. Archibald Scott, D.D., of Helmsdale, Sutherland, Scotland, that the real definition is "Run in the Thicket" or "Den of the Rough."—Calgary Herald.

Every town has a rich man who wears the same straw hat five seasons. And it's none of our business.

## Health Authorities Constantly Urge

Pasteurization Of Milk

Milk and milk products are generally recognized as the most important factors in the food supply of the family, but it is not without its dangers as a carrier of disease germs. It is for this reason that health authorities everywhere are urging the public to constantly urge the pasteurization of milk as the one way by which it can be made absolutely safe. A wealth of material might be written about the value and safeguards of the process. But the large dairies serving important centres pasteurize all their milk. From the health standpoint pasteurization is sufficiently important that it should be done at home. A supply from a commercial plant is not available. How this is done is set in the pamphlet "Why Pasteurize Milk" which has just been issued by the Department of Agriculture at Ottawa. Briefly, by the use of a thermometer and a double boiler of suitable capacity milk is held at a temperature of 145 degrees Fahrenheit for a period of thirty minutes, then cooled quickly to below 50 degrees Fahrenheit. When thus treated milk is safe.

## An Unusual Experiment

Research Association Believes Sheep Skins Could Grow Wool Forever

Experiments are being made by the Research Association for the British Isles and the Worsted Industries, which may lead to unlimited quantities of wool being grown on the skins of sheep that have been killed. There seems to be no reason why these skins and hair cells should not be made to live indefinitely, said an official of the Research Association. "One day perhaps the skins of sheep may be stretched on frames, bathed in suitable solutions, and used as chemically maintained wool factories years after the sheep is dead and sold as mutton."

## Meeting Of Teachers' Association

T. C. McKay, of Warman, Sask., was elected president of the Saskatchewan Inspectors' Teachers' Association at the concluding session. A resolution asked that the Teachers' Association Act, 1920, be amended to make provision for fully qualified teachers working in Indian schools under the Federal Government. The resolution asked that they come under the scheme, if they so wished, and become eligible for old age pensions.

# Canada's Greatest Opportunity Lies In Increasing The Production Of Livestock

## At A Time When The Prices For

grains and other farm products have been declining rapidly, livestock prices have shown outstanding strength. At present relative prices, says the monthly letter of the Royal Bank of Canada, it is definitely more profitable for the farmer to export his grain in the form of cattle, cheese and bacon than to attempt to sell his grain in a world market burdened with surplus supplies from many countries.

Perhaps the outstanding opportunity in livestock at the present moment is in the market for pork and bacon. The demand for bacon in Great Britain has grown at an amazing rate. In 1921, imports of bacon into Great Britain amounted to 636 million pounds. In each of the last three years the total imports into that market have been more than 900 million pounds. This is an increase of 50 per cent, and more of the additional supplies have come from Denmark. Canadian shipments, however, are no greater today than they were forty years ago.

In 1924, the average price of Canadian bacon on the British market was equivalent to the price which it would have fetched in September, 1900, in that market. In 1924, Canadian exports amounted to 120 million pounds. For the present year it is doubtful whether they are worth as much as 20 million pounds. In 1924, the price of which was approximately 70 per cent, higher than at present, and the price of barley, the most important factor in the bacon hog, was more than two and one-half times the price now prevailing. These facts seem to indicate that the possible margin of profit in hogs has improved decidedly.

British imports of dairy products have also been maintained, although the proportion secured from Canada is declining. Canadian exports of butter have practically disappeared and shipments of cheese are one-fifth less than they were five years ago. Canadian cheese long held first place in the British market and as late as

## 1929 received a substantial premium

for its high quality.

The rapid decline in Canada's export trade in animal products has been partly due to the great increase in domestic requirements. This has been very great during the past few years, and production has not increased in keeping with the growing demand. Shipments overseas have been drastically cut, and in some instances, such as butter and lamb, large quantities have been shipped into Canada. Butter imports amounted to nearly 35 million pounds in 1929, and imports of mutton and lamb to over four million pounds. Substantial quantities of beef and pork were also brought in.

Millions of bushels of low-grade grain and coarse grains are produced in Canada each year. Mill officials, screenings and similar products are available in abundance. Under prevailing conditions it is more profitable to market these commodities through the medium of livestock than to export them by selling them as raw materials.

The home market itself offers opportunities for the expansion of Canadian production. The efforts of the Imperial Marketing Board have created conditions favorable to the extension of Canadian exports in the form of livestock. The high standard of quality achieved by producers of Canadian bacon and cheese is well known overseas. Farmers and others interested in Canadian livestock must well consider their opportunities in the development of the industry and the extension of both the domestic and export markets for such products. The assurance to importers of a steady supply of quality and steady supplies with quality and price in keeping with similar products of other countries is a fact to be considered by the industry and for greater diversification in Canadian agriculture.

## Germany Has Big Libraries

Berlin Leads Cities With Over Nine Million Volumes

Statistics have just been published regarding the number of books in Germany's libraries. According to these the total number is 54,000,000 volumes. Berlin leading with 9,300,000 and Munich following with 4,200,000. In consequence of the regulation that one copy of every new copyrighted work must be sent to the "Deutsche Bucherei" at Leipzig, that city now contains 2,130,000 books, and four other German cities possess libraries that have over a million.

## Development Of Dairying

The Manitoba Livestock Credit Association, in conjunction with the Winnipeg Board of Trade, is working on a scheme for the development of dairying and increasing the production of poultry and eggs, and the rehabilitation of hogless farms.

### Unemployment Relief Policies

Unemployment not only casts a sinister shadow over the world today, but the substance of the thing has hundreds of thousands, even millions of men, women and children in its grip. Admittedly the situation is a serious one, first, because of the actual suffering entailed thereby, but also because it is causing men to "see red," as the saying is, and lose faith in all established and orderly methods of government, society and business. The tendency is to repudiate economic truths, and to try experiments with almost any half-brained proposal that may be advanced. Here lies the real danger for the future, because many of the suggested remedies would result in a state of affairs far worse, and cause more suffering, than the condition they sought to improve.

One suggested temporary remedy for present unemployment that undoubtedly finds support in many quarters is the substitution of handwork, manual labor, for machinery in prosecuting relief works. For example, it is reported that one large United States city is developing a program of winter work that will substitute pick-and-shovel brigades for machines, the object being, of course, to give work to a larger number of men. The same suggestion is being advanced in connection with municipal relief works throughout Canada.

The question is: Should we deliberately abandon our labor-saving devices and revert to the painfully slow methods of yesterday, to provide jobs for the unemployed? Is it wise to do so, and, in the long-run, are the unemployed benefitted thereby? The subject deserves close study.

Without doubt, a good deal of work can be manufactured by substituting primitive manual methods for more efficient machine-processes, remarks the New York Journal of Commerce. Indeed, by some systematic elimination of our modern labor-saving devices, it goes on, we could speedily reduce any modern industrialized community to a condition which would require the full-time effort of every able-bodied person to prevent wholesale starvation and death from exposure. But, without carrying the policy to any such lengths, is the suggestion good in any way?

In one of our prairie provinces where much road work is being carried on as a means of providing employment, decision was reached to build a road without use of machinery and solely by horses and manual labor. Objection was raised by some people that by using machinery for certain phases of the work, a greater mileage of good road could be constructed for the same money while giving employment to just as many men because of the greater mileage involved. This view was rejected, no machinery was used, and the work proceeded. A total of five miles of graded road was the result. Now it is realized that with the same number of men given work, practically the same expenditure of money, and the use of a certain amount of machinery, three times that mileage could have been constructed. The farmers of the district who were given relief work on that road would have benefited more from fifteen rather than five miles of good road, while in the years to come they may regret the loss of the taxation levied by this relief expenditure. They gained nothing temporarily, and will lose in the long run.

Fifty men digging a trench for a sewer or other pipe line with pick and shovel will accomplish just so much in a day, but the same fifty men working in conjunction with a trench-digging machine will accomplish several times as much, and with little more expense. Or fifty men cleaning snow off sidewalks with shovels will do no fraction of the work that the same fifty men following after snowploughs will do, yet the same number of men will be given work and practically the same expenditure of public funds be required.

There should be no hasty assumption that the elimination of machinery in carrying out unemployment relief works is wise, or that more work for the unemployed can be thus produced. It does mean that the work that can be accomplished for the money expended, and for this economic loss everybody, including those at present unemployed, will have to pay through taxation in the years to come.

Other suggested remedies have more to commend them, as, for example, the proposals in Great Britain and Germany to raise the compulsory school attendance age by one year, thus keeping some hundreds of thousands of children in school for a longer period instead of having them require employment replacing others now at work, or merely added to the ranks of the idle and out-of-work. There is something constructive in such a policy, benefiting the coming generation of workers, and raising the whole educational standard of the nation.

So, too, is there much to be said in favor of the suggestion that the present six-day or five and a half-day work week be reduced to a five-day work week, or that the present week be reduced to a 7-2-2-2 or even a 6-4-hour day. As the head of one of the greatest industrial corporations in the world lately recently pointed out, the greater the amount of leisure time enjoyed by the workers of the world, the larger will be their demand for the things necessary to the enjoyment of those leisure hours, thus creating a greater demand than ever for the production of the things they require, so that more men be employed, more goods produced and purchased, a higher, rather than a lower, standard of living created.

### Not Good Publicity

**Stunt Flying Does Not Help Aviation  
In Any Way**

In the Prefecture, N.J., airport on a recent Sunday, 5,000 people were watching the marvels of skill in flight when an airplane, piloted by veteran Alton H. Russell, went into a tail spin and crashed, injuring Russell seriously and his passenger fatally. More than three thousand were endangered; the crash came within 300 feet of the massed spectators. In Toronto about the same time a pilot and two passengers were burned to death in a low crash after stunting.

The friends of commercial aviation in view of the number of such fatalities, may well ask themselves what kind of publicity will most benefit their young industry: the plaudits of the crowd gathered to risk their own lives in seeing reckless pilots risk theirs, or the story of the really remarkable advance that is being made in aviation with a purpose. For, almost unnoticed along with all this dangerous stunting the carrying of air mails and passengers goes on with comparative safety, which shows the situation were not constantly diverted from it by fatal accidents in exhibitions, most encouraging.

One must not be too easily lulled by accident with a hundred people killed by a plane out of control to open the eyes of aviation authorities to the necessity of curbing the practice of recklessly showing off what wonderful things can be done in the air—with luck, which does not always attend the venture.

### A Mother's Anxiety

**About Her Delicate Daughter**

"She seems to be fading away," writes an anxious mother, recently, about her daughter. "Thousands of times I have tried to make her eat, but she cannot. Her daughters endure a trying life, and their cheeks are pale, their eyes dull, their step languid and every movement is an effort. I have neglected their suffering grows more and more distressing."

If your daughter complains of heartburn, pain in the side, loss of appetite, or backache, her appetite is uncertain and her spirits low—she needs Dr. Williams' Pink Pills. Give her Dr. Williams' Pink Pills. These pills actually renew and enrich the blood. They make sickly girls well and help them to eat and sleep and bring back all the charm and brightness of youth.

Dr. Williams' Pink Pills are sold by all druggists. Write for a free booklet, 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

### Pioneer Paces

**Death Of One Of The First White Women Born In Western Canada**

The death has taken place of Mrs. Agnes Adelaide Mary McKinnon, 77, one of the first white women born in western Canada. A native of Port Garry, daughter of Philip MacQuarrie, she had been a member of the Royal Canadian Mounted Police since 1880. She went through the Indian rebellion at Port Garry, and the 1885 Sioux riot when she was living at "Apples." She was the wife of John McKinnon, contractor, Winnipeg.

A resident of British Columbia for 20 years, she was a pioneer, and her husband had lived here for 12 years.

**Cause Of Asthma.** No one can say with certainty exactly what caused the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to eradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from the scourge of the bronchial tubes. It is sold everywhere.

### Germany Holds Strain

One of the strangest fairs in the world is to be held at Frankfurt, Germany. It is an insect fair at which collectors from all parts of the world gather to display their rare butterflies, moths, beetles, grasshoppers, crickets and other insects. Huge sums of money are exchanged in sale of these insects between various collectors.

Peevish, pale, restless, and sickly-looking men enter their condition to worm-farm. Modern Dr. Exterminator will rid them there and restore health.

### Canada and Empire Reformation

Canada is yearly playing a bigger part in Empire reformation. Fifty-three per cent. of the tree seed exported has gone to Great Britain, forty per cent. to New Zealand, and the remainder to Australia, Ireland, and other parts of the Empire. During the past ten years the British Forestry Commission has planted 140,000 acres of softwoods, the greater part of the seed used coming from Canada.

### Marvels Yet To Come

Inventor Responsible For Train Telephone Has Great Vision For Future

Forecasting the future always is an interesting occupation. While in this respect the chief interest of the public is in the weather for tomorrow, their unusual prognostications attract attention. An article published in *Maclean's Magazine* dealing with the genius of Mr. John C. Burkholder, who is responsible for the "train telephone" now in operation on the Canadian National Railways, sets forth other ideas in the mind of this inventor.

Among the marvels that are to come, he sees the time when newspapers may appear in different cities by transmitting the whole edition, page by page, illustrations and all, by telegraph, with only a matter of minutes delay. The streets are running. City streets are to be three-deckers, and moving sidewalks will be available. Street cars will be run by radio and will bring from London and New York the greatest stage presentation, and "the wheel of industry may be turned by the power contained in a glass of water and its plants lighted by rays captured from the sun."

Perhaps, a few decades ago Belamy had such a vision and a great deal of it came true. The world is not slow in accepting the marvels of most vivid imagination cannot foresee the marvels that are yet to come.

### A Deadly New Rifle

**Works Like Machine Gun Even Under Fire**

The possibility of making every infantryman a machine gunner was demonstrated at Bisley in the presence of representatives of the War Office, the Royal Air Force and the Admiralty, when a series of tests were made of the Vickers-Berthier and service rifle and the Pedersen self-loading rifle.

The machine rifle was subjected to a severe ordeal. It was hurled deep in the sandy soil. Then it was resurrected, and in the hands of a capable demonstrator it ticked off single shots, and afterwards spurted out lead at the rate of 400 rounds a minute.

An even more severe test was to submerge the machine rifle in a tank of mud and water of mortar-like consistency. On recovery, with its mechanical efficiency and accuracy unimpaired. The weapon was taken into a heap of its component parts in 10 seconds. It was quickly reassembled and ready for action. One thousand rounds rapid were fired on the 100 yards mark, and the average period of its burst of fire.

**Western Canada Sugar Production**  
About 24,000,000 pounds of sugar will be produced this year from sugar beets grown in Southern Alberta. About 14,000 acres of beets were under crop this year. The centre of the industry is at Raymond.

Has it ever occurred to you that there is no last number? The process of counting cannot conceivably be terminated. Dr. Dantzig points out. Every number has a successor. There is an infinity of numbers.

**Regulate On The Farm**—Every farmer and stock raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and stock remedy of great potency. As a substitute for kerosene and kerosene lamps, it is safe by candle light. It is a safe remedy for colds, coughs, and all other ailments.

"I wish you could pay a little attention to what I am saying," roared the exasperated barterer to a stubborn witness. "Well," was the reply, "I'm paying as little as I can."

### Chapped Skin

Wind, snow and salt brine unprotected skin surfaces. Minard's Cream is a skin cream that soothes and affords full protection.

### Drug Ring Smashed

**Thirty Arrests**

United States Federal Agents Make Thirty Arrests  
Thirty arrests in seven cities, and seizure of drugs valued at \$25,000, were reported by United States federal officers who for six weeks have worked under cover in an effort to smash what they described as an "international drug ring, one of the biggest and most powerful in the United States."

The secret government agents caused the arrests in Syracuse, Buffalo, N.Y., Utica, Albany, Troy and Schenectady. The coup was said to have been engineered by narcotic officials at Washington and New York.

Three were taken into custody in Syracuse Saturday night, Nov. 1, after undercover men, who had gained the confidence of several of the men, said by them to be members of the ring, were hired to Syracuse with invitations to a "wild party."

### Instructions For Poultry Breeders

**Course Is Announced For Young Breeders Of Poultry By Calgary Poultry Association**

A course of instruction for young poultry breeders is announced by the Calgary Poultry Association, extending from November to February 6th. A mature poultry show, when each student will be asked to judge a section of the show, after which competent judges will comment on the awards, will conclude the course.

**Persian Balm** is unrivalled for promoting feminine loveliness, tones and rejuvenates the skin. Makes it exquisitely soft-textured. Makes hair lustrously white. Especially recommended to soothe and relieve roughness or chafing caused by weather conditions. Indispensable to every daily woman. Cool and refreshing. Delicately fragrant. Magical in results. Never leaves a vestige of stickiness. Persian Balm is the one toilet requisite that every woman should have for charm and elegance.

**Silicate of Soda Glue**  
In setting up paper boxes, a mineral glue—silicate of soda—is of great utility, and, in connection with this a number of experiments are being carried out by the Forest Products Laboratories, Department of the Interior, Ottawa.

**Minard's Liniment** refreshes the scalp.

**Meat Consumption In Canada**—The per capita consumption of meats in Canada last year was: beef, 676,000,352 pounds or 69.09 pounds per capita; pork, 788,638,774 pounds or 81.52 pounds per capita; mutton and lamb, 70,511,238 pounds or 7.20 pounds per capita.

**Wash pen with Minard's Liniment.**

More than 9,000 elephants work in Siam at the task of transporting logs from forest to river.

Two women are training as air pilots to every three men in England.

**Heart and Nerves So Bad Was Unable To Sleep For Hours**

Miss Theresa, M. Ravary, Gillingenford, Ont., writes: "I was troubled for some time, with my heart and nerves, especially on falling at night when I would be unable to sleep for hours. I was easily fatigued, and became very excitable and irritable. A friend recommended Milburn's Heart and Nerve Pills and after taking them for a few weeks I could sleep at night and rapidly regained my former state of health."

## FRUIT

### Mothers! Don't Risk Their Health With Violent Purgatives

Constipation is one of childhood's greatest enemies. Unless the intestinal system is kept clear and clean ill health is almost sure to follow.

But severe acting laxatives are dangerous. The bodily system of child or adult is not meant to withstand the unnatural, forcing action caused by ordinary, cheap cathartics.

ENO'S Fruit Salt is a glass of water, every morning, in the safest, surest and most pleasant way to insure cleanliness and perfect health.

## THE DUSTY HIGHWAY

—BY—  
CHRISTINE WHITTING  
PARMENTER  
Copyright 1929

### CHAPTER V.—Continued.

"He moved on slowly, reaching Nick's gate and looking up at a doorway beautiful with holiday, peeling paint. There was no sign of Gay. In Baker's most men come home at noon, and at eleven-thirty their wives are in the kitchen. With the unerring instinct of one born and raised in the community, John Maxwell made his way toward the side door.

He saw then, that Gay was in the orchard, hanging some diminutive pink garments on the line. Her task done she glanced across at her neighbor's garden, where, still clad in crisp blue linen, Mrs. Halliday was superintending the setting-out of plants. Glancing up, she caught Gay's eye, and bowed. There was nothing friendly in the act—nothing akin to the greeting she had tossed across the square to Nick, a few days earlier. John Maxwell's grey eyes hardened. Then, as Gay caught sight of him, he smiled.

"Mr. Maxwell! What brings you out this morning?"

"Only the spring. Couldn't seem to settle down to work, and Nick gave me leave to take a holiday."

Gay laughed and said: "Will you stay to dinner with us?"

"Not today. Guess you have enough to do, cooking for your own three boys. Nick's still a boy to me, you know, if he has been married long enough to acquire a family. Do you like your new neighbors, Gay?"

"They had reached the porch, and the girl sank down wearily, glancing at the pocket of her dress, which was held at one corner by a safety pin.

"I hope you don't think I use pins instead of needles for my mending." Her glance strayed to the trim blue

figure across the hedge, and her color rose. "It's funny they do. He can just reach my pockets and he will pull at them. Sometimes he tears them when I can't stop to mend."

"He was silent a minute before she said, in answer to his question: "You asked about the Hallidays? I hardly know them. Nick called one night when I was laid up with a headache. He says they're very pleasant. She's an artist, and they're fix-up the house beautifully. It makes me crazy to fix ours; but everything takes so much money. There's Sonny calling. He's just waked up, but boy's sleeping. Do wait and see him, Mr. Maxwell."

"Yes, I'll wait. I want to poke round your penny box. Most all our good winter-killed this year."

But when Gay had gone John Maxwell did not toward the pantries, but set on the advent of the second blue-clad figure opposite. The flush that had mounted to Gay's cheeks as she glanced at her new neighbor, did not escape him; nor had the tired lines beneath her eyes.

He wondered if it were only the children who had caused Gay's lack of sleep. Was it possible that Nick, the steadfast fellow in the whole world, was making a fool of himself by another woman? Stranger things happened every day, and Nick was only a boy—a boy who had never quite had his fling.

John Maxwell understood. He himself, had married at twenty-one. He remembered a time some four years later, after the advent of the second baby, when life had seemed a good deal of a treadmill. But there had always been Mary. Never for a moment had he looked at anybody else. Surely Nick—

"Here's my big boy, Mr. Maxwell," Gay stood in the doorway, Sonny, fresh and sweet in a pink romper, in her arms. For a moment the tired lines had left her eyes, and only the pride of motherhood was there. John Maxwell, many times a grandfather, thought he had never seen a sweeter picture. He stretched out his arms, and with a delighted cry the boy went to him.

"Here's my little boy, Mr. Maxwell," Gay said. "He's rather shy."

"I think he remembers my last visit," as well as my watch charm that always fascinates the youngsters."

The caller had seated himself upon the steps again, and given the boy his watch. Sonny stared at it a moment soberly, then held it to his ear in a way that made them laugh.

"He looks more like his daddy than he did, Gay."

"I've noticed that. I love a boy to look like his father. It's strange, Mr. Maxwell, but Nick wanted a little girl. I thought a man always wanted a son; and Nick's such a man's man, too. But I honestly think he was disappointed, especially when the income baby wasn't a 'little sister'; though he wouldn't change either of them now," she added, smiling.

"Daddy?" asked the child, looking up questioningly at his mother.

"Nearly time for him," Gay answered, and smiled tenderly. "Daddy's the first word he said, Mr. Maxwell. I remember feeling the least bit hurt! And Nick's such a wonderful playmate that he adores him."

She stopped because the boy had uttered a delighted squeal. He wiggled away from John Maxwell's knee, while the watch, forgotten, hung limply by his chain. Nick was coming! With swift, unsteady feet the child ran to him, and with a noise of genuine delight the president of the First National Bank saw that his paying teller had no eyes for the lady across the hedge. He stooped with outstretched arms, and lifting his small son high, kissed the top of his bright head—augured him a moment rapturously, and settled him on his shoulder as he came forward.

"A pretty sight, that," said John Maxwell softly.

But Gay did not speak. She had

arisen, and was watching her husband with an intensity not quite natural in a wife of four years standing. The blue figure in the adjoining garden was also watching; though Nick was serenely unconscious of an audience. He came nearer, grunted, and said: "This is how you take a holiday, Mr. Maxwell—calling on my wife? Mind if I kiss her? It's a sort of habit I've acquired."

"A good habit," said John Maxwell quietly. "Don't stop for me!" and the fact did not escape him that as Nick bowed, Mrs. Halliday, struggling as if disgusted at this display of family affection, turned away.

"Damn her!" said John Maxwell before his head.

He said it again when he was in his private sanctum at the bank that afternoon. Nick had insisted that he stay to dinner, and as they started back to work, Mrs. Halliday appeared on her front porch. She didn't speak, but her smile was so intriguing that Nick stopped, exchanged a few words about the garden; presented Mr. Maxwell as his "chief," and, at a subtle expressed hint from the lady, promised to stop over after supper and survey her peony plants.

"I've been hard at work in the garden all the morning," he apologized prettily, with a glance at her spotted nose-gown. "I'll forgive my appearance now. I'll promise to look less disreputable this evening."

"You look," Nick instantly replied, "like a part of the garden itself," which bit of gallantry brought a sudden, satisfied light to the woman's eyes.

The walk to the bank was, on the whole, silent. It was as they turned into Main Street that Nick said, as if he were something he'd been considering: "Queer, isn't it, how some women can work in a garden, or round a house, and be so comfoundedly neat? Now Gay—"

John Maxwell snorted angrily. "Neat! My dear boy, that woman never set out a plant in her whole life! She stands about looking pretty, and ordering some man to do the dirty work. Take care, Nick, that she doesn't take to doing that herself."

Nick stared at the frowning visage of his old friend; then laughed and said: "To do her dirty work?"

"There are all kinds of dirty work, my boy," answered John Maxwell, so soberly that Nick exclaimed: "Good-bye! Mr. Maxwell, you don't think—"

"I don't think anything," broke in the older man harshly, already fearing that his misdirection might put ideas into Nick's head. "I don't think anything except that you'd better wake Gay up. She's got hollows in her cheeks."

They had reached the bank, and without another word the president marched into his private room and slammed the door.

"Damn her!" he said for the second time that day.

Yet, when he cooled off and thought it over, he realized that he had no grounds whatever for his suspicions. As he had said to Gay, Nick was still a boy, though he had shouldered a man's responsibilities. He shouldn't be enjoying talking with a pretty woman! John Maxwell smiled at the thought that he, himself, was prone to do so. Should he blame Nick because Gay seemed tired and listless? Most young mothers were, being unused to broken sleep and sudden loss of freedom. He re-

membered his own first wife, and how she had suffered from that cause.

### Belonged To Trafalgar Fleet

"Imprecable" May Be Kept In Repair If Plans Are Successful

After a century of service in the Royal Navy, "The Imprecable" some 20 years ago, was condemned to be sold. She is the last of the ships present at Trafalgar now actually active. Whitley Cook persuaded the Admiralty to lend him the ship, and she was moved to Falmouth and maintained at his expense. For the last three summers she has been used as a holiday training ship. Efforts are now being made by naval, military and civil service to keep "The Imprecable" in repair and provide for its maintenance.

### Guard the Baby Against Colds

To guard the baby against colds nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order the child will not catch cold. The health of the little one will be good and he will thrive and be happy and good-natured. The Tablets are sold by medicine dealers or by mail for 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Income Tax Collection Record

Record Breaking Mark Is Set By Income Tax Collections

A new all time record for income tax collections has been set since April 1, 1928, up to the present, \$69,000,000 having been deposited with the Federal treasury in that period by Canada's taxpayers. According to announcement of the Department of National Revenue, this total is approximately \$2,300,000 ahead of the like period last year.

The record-breaking mark set by the income tax collections is interpreted in government circles as indicating business conditions in the Dominion are favorable. Money, at least, cannot be extremely scarce with the taxpayers paying up so promptly. Other financial returns for the period under review are not, however, so favorable. The customs revenues were dropped \$20,000,000, while excise revenues are down \$15,000,000. The drop in the latter is attributed largely to the prohibition of liquor exports to the United States.

New Survey Ships For Canada Construction at an early date of two hydrographic survey vessels, one for use out of Victoria on the Pacific Coast, and the other for the St. Lawrence, is under consideration by the Dominion Government, stated Hon. Alfred Durnan, Minister of Marine, who was in Victoria on an official visit of inspection.

Certain stomach conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them, however, the child suffering from Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

Diet used by Egyptians in Queen Cleopatra's time are exhibited at the Field Museum in Chicago.

### Afraid Of The Truth

Impossible To Get Unconscious News From Russia

Complaints are sometimes made that so many British newspapers, including the London Times, do not maintain accredited correspondents in Moscow. But in Russia today there is no place for a responsible correspondent of an independent newspaper. When the Times send a correspondent to Russia it will be to supply its readers with honest and unbiased information, and such information can clearly be neither gathered nor telegraphed by a correspondent working under an arbitrary system of espionage. There is no discrimination in this matter, as is sometimes supposed, between Russia and the rest of the world. If similar conditions were ever to prevail in Italy, for instance, or in Turkey, the correspondent of the Times would instantly be withdrawn, as correspondents have sometimes been withdrawn from foreign countries in the past. It is not the least significant indictment of the present regime in Russia that its leaders are afraid to let the world know the truth—London Times.

### Little Helps For This Week

"Whatsoever a man soweth, that shall he also reap."—Galatians VI. 7.

God will not seek thy race. Nor will He ask thy birth: A few drops in the desert, What hast thou done on earth?"—Persian.

And they who sowed the light, shall reap the harvest of morning.

The present life is the seed-plot of the future state, and the harvest which we reap in eternity is the same in character and quality as that which now we sow. Every thought we think, every word we speak, every action we perform, every opportunity of service neglected or improved, is a seed sown in us, the fruit of which shall multiply either untold miseries or myriad blessings in the eternity into which we go.

—William M. Taylor.

### Picture of Health Now

"In May and June I was badly run down and had faint spells until it was a drag to do my work. In July and August I didn't seem to pick up so I decided to try Lydia E. Pinkham's Vegetable Compound because I saw it advertised. I took two bottles and now I am the picture of health. I feel fine, do all my work and milk two cows. If any woman writes, I will certainly answer her letter."—Mrs. George E. Gillespie, Punichy, Saskatchewan.

Lydia E. Pinkham's Vegetable Compound

## CARRY-OVER OF WHEAT FOR 1931 MAY BE LESS

Ottawa, Ont.—Canada had a surplus of 313,000,000 bushels of wheat on Oct. 31, according to an estimate in the review of wheat conditions issued by the Dominion Bureau of Statistics. If the present sales policy is continued, the carry-over at the end of the present season (July 31, 1931), will be less than last year. The review states:

"The carry-over of wheat in Canada at July 31, 1930, was 112,000,000 bushels and the total 1930 wheat crop is now estimated at 396,000,000 bushels. Allowing 110,000,000 bushels for seed, home consumption and unmerchantable grain, and adding \$5,000,000 bushels exported in the period up to October 31, accounts for a total of 195,000,000 bushels.

On the basis of the official estimates of carry-over and production, a surplus of about 313,000,000 bushels existed at October 31, and it is seen that a continuation of present sales policy will result in a reduced carry-over in 1931. A great deal depends upon economic conditions as well as economic policy in the United Kingdom and Europe. The reduction of Northern American supplies to normal before the 1931 season will be an important factor.

The 1931-32 season will be an important factor in future price levels. The fall movement of grain from the head of the lakes assures adequate stocks in ready positions for winter export. The fortunate distribution of the Canadian wheat crop according to quality will also be a helpful factor.

The high quality wheat for eastern shipment and the low quality wheat suitable for the Orient are in the most favorable situation for export. The former, being better centered in Manitoba and Southern Saskatchewan, while the latter is produced in the northern and central regions of Alberta and Western Saskatchewan."

"After a slack period during most of October, daily deliveries of wheat began to exceed those of the same date last year on October 25, and since that date the rate of export for the 1930 crop has continually widened the increase over the 1929 total.

In the crop season up to November 11, the total wheat marketed in 1930 was 196,888,000 bushels compared to 180,600,000 bushels in 1929. The provisional estimate of the 1930 wheat crop of the west was made on November 13, and forecasted a crop of 374,000,000 bushels. Of this amount, about 42,000,000 bushels will be retained for seed in the west and at least 15,000,000 bushels will be merchantable or lost in cleaning on the farms.

Estimates will be made later of the amount fed on farms and custom milled by country mills for consumption on western farms. On the basis of the provisional estimates, reasonable deductions for valid items, probably 110-115 million bushels of wheat were still available for western farmers on November 11th.

## No Change Likely

Tariff At Churchill To Be Same As Other Canadian Ports

Ottawa, Ont.—It may be taken for granted that the present government is not contemplating a tariff schedule on goods coming into Canada at Churchill that would be different from the tariff on goods coming at any other Canadian port. This was the opinion expressed in government circles here in reference to the proposal by Hon. R. A. Hoey, acting premier of Manitoba, that goods be made a free port of entry for British goods coming to Canada.

A number of ports in Europe are known as "free ports." Goods may be shipped into storage in such ports without any customs restrictions and then sold. However, such imports have to meet the tariffs of the countries to which they are ultimately consigned.

Mexico In Market For Wheat  
Chicago—Reports were received at the Chicago Board of Trade from Mexico City to the effect that the Mexican Government had arranged for the purchase of 200,000 bushels of Canadian wheat from the Canadian port.

Might Help Unemployment  
London, England.—The Labor Government is considering a "back to the farm" solution for the nation's unemployment problem. It is considering a bill to provide garden plots and small farms for jobless men.

## To Stabilize Wheat Prices

Advocate Measure To Restore Confidence and Ameliorate Western Conditions

Portage la Prairie, Man.—Organized agriculture of the prairie states stands square back of the prairie's pilgrimage to the east to seek Dominion government aid for the west. annual convention here, United Farmers of Manitoba gave their endorsement to the premier's mission to gain Dominion assistance in restoring confidence and in ameliorating conditions in the west.

Already United Farmers of Alberta and United Farmers of Canada, Saskatchewan section, have taken a stand in favor of fixed prices for wheat by means of Dominion intervention, admittedly the object of the prairie premier's journey to Ottawa. The Manitoba body, however, erased its mention of price fixing from the resolution which it approved unanimously.

Though Manitoba farmers adopted to policy on "pegged" wheat prices, as advocated by George H. Williams, president of the Saskatchewan body, they decided to send a representative to the interprovincial conference in Saskatoon. At this meeting, the national and provincial agricultural intervention will be considered.

The Manitoba delegation will be headed by no one of its directors, but steps to be taken at the meeting.

In the course of open debate on the question, Mr. Williams stated that United Farmers of Ontario and the Canadian Council of Agriculture would be represented at the meeting, as well as prairie farm body delegates. The Manitoba convention approved the action of its directors, deciding to send a delegation to the Saskatoon party, scheduled November 26 to 28.

## Exhibit Of Choicest Products

Varied Display Seen At Royal Winter Fair In Toronto

Toronto, Ont.—The choicest of Canada's agricultural products and the choicest of the world's livestock, domestic animals and poultry were on display here, when, without any ceremony or speech-making, the gates of the Royal Winter Fair were opened to the public. Housed in the buildings at the Canadian National Exhibition grounds were hundreds of horses, livestock, poultry, foxes, and cats and dogs, seeking glory in their respective classes, while in other buildings were sales and aisles of fruit, flowers, dairy products, seed grains—the best Canada and the United States has to offer.

Perhaps the most varied show was the grand display of apples, entered for the various projects and associations from Prince Edward Island to British Columbia. The displays consist of boxes of apples packed for export, and placed on box beside the other, 10 crates high and 25 crates wide, forming a great glimmering display of red and green.

The show was officially opened by Sir Robert Borden, when the former premier of Canada addressed the throng in the huge Coliseum.

## Wheat Acreage Should Not Be Reduced

Would Be Economic Fallacy In Opinion Of H. S. Fry

Toronto, Ont.—Reduction of acreage seeded to wheat by farmers of western Canada, in an effort to cut export production and thus limit the surpluses of stocks, would be an economic fallacy, in the opinion of Harold S. Fry, of Regina, chairman of the general publicity committee of the World's Grain Exhibition and Conference, which will be held in Saskatchewan's capital in 1932.

Fry is also publicity director of the Saskatchewan Wheat Pool. According to Mr. Fry, Canada produces in largest quantities the worst, best hard spring wheat and ranks as the world's greatest exporter of wheat. He held it paramount that Canada maintain this supremacy. Either by finding new markets for wheat, lessening the cost of production, finding new uses for wheat—or a combination of all three.

Advocates Free Port

Portage la Prairie, Man.—Proposals that Churchill, the West's sea harbor on Hudson Bay, be declared a free port of entry for foreign goods, was made by Hon. R. A. Hoey, acting premier of Manitoba, at the annual convention of the United Farmers of Manitoba. He considered that such a move would tend measurably towards the establishment of the West's agriculture on a permanently profitable basis.

## Rapid Telegraphy

Telephone Transmission At A Speed of 9,120 Words a Minute

London, Ont.—Addressing the London branch of the Engineering Institute of Canada here, R. B. Steele, assistant chief engineer of the Canadian National Telegraphs, announced telegraph transmission at the speed of 9,120 words a minute will be made possible shortly by further extension of the carrier current system.

In 1927, Mr. Steele said, the C.N. Telegraph increased by means of carrier current the capacity of a pair of wires from 400 words a minute to 4,120 words a minute for a single pair of wires. Further development of the system now made possible the transmission of 9,120 words a minute for a single pair of wires.

## MORE FUNDS ARE SET ASIDE FOR RELIEF PURPOSES

Ottawa, Ont.—A new list of expenditures approved by Hon. Gideon Robertson, Minister of Labor, brings the amounts of total expenditures to \$45,660,000. Additional sums approved for Nova Scotia and Manitoba augmented the previous total by \$1,038,753.43, of which the eastern province's share is \$916,205.43, and that of Manitoba \$122,550.

The grand total is now distributed as follows: Nova Scotia, \$1,038,308; Prince Edward Island, \$144,000; New Brunswick, \$400,300; Quebec, \$2,501,800; Ontario, \$13,745,103; Manitoba, \$122,550; Saskatchewan, \$1,476,941; Alberta, \$2,607,336; British Columbia, \$1,325,452; Yukon, \$5,600; Canadian Pacific Railway, \$1,514,000; Canadian National Railway, \$1,765,498; grade crossing fund, \$50,000.

The program of construction which will be engaged in by the Canadian National Railways, under the arrangement whereby interest on necessary borrowings is paid by the government, was announced here recently. The arrangement is designed as to speed up construction, etc., in order to give employment as soon as possible. The total estimated cost of the various projects, according to the program, is \$9,048,653, of which \$6,654,748 constitutes the proportion to be paid by the railways. The remaining sum will be met out of the grade crossing fund and other sources. The amount of contributions to be determined by the Board of Railway Commissioners.

In addition to the total sum mentioned there is a further amount of \$5,110,750 for rails and ties. This list of works includes: Freight storage shed, Port William, Ont., total cost \$132,000; railway property, \$132,000. Subways, Saskatoon, total cost \$300,000; railway property, \$400,000. Diversion railway line, Westport, Ont., total cost \$500,000; railway property, \$500,000. Main line for heavy haulers rail at a total cost of \$1,102,054, to be borne by the railway.

Lay track on approximately 143 miles new branch lines, total cost the railway, \$1,540,000.

## ATTENDS V.C. DINNER

Col. C. W. Peck of Prince Rupert, B.C., only member of parliament to hold the Victoria Cross, who was one of the many holders of this medal to attend the V.C. dinner held November 8, in Toronto, Ont.

## No Interference

Sir Henry Thornton says C.N.R. Has No Complaint Regarding Treatment by Present Government. Ottawa, Ont.—Interviewed here Sir Henry Thornton, chairman and president of the Canadian National Railways, said:

"I have no particular comment to make upon recent running and reports relating to the Canadian National Railways other than to say that the administration has not the slightest complaint regarding its treatment by the present government and has no apprehensions with respect to the future. We have good steady jobs minding our own business and trying to operate the railway. There does not seem to be any immediate reason for undue excitement."

Sir Henry spent some time in conference with Hon. Dr. R. J. Manion, Minister of Railways, who returned this week after a tour of the Maritime provinces and drew up plans under discussion. It was stated afterwards.

## Decrease In Fall Grain

Interesting Report Issued By Dominion Bureau Of Statistics

Ottawa, Ont.—The area sown to fall wheat crops for the season 1931 as of Oct. 31, 1930, is estimated at 84,600 acres in a report issued by the Dominion Bureau of Statistics. This represents a decrease of 118,000 acres, when compared with the total of 1,042,000 acres sown last year.

The report of fall wheat on October 31, is reported as 96 per cent of the ten-year average, against 88 per cent on the same date in 1929. The report also deals with fall rye, showing that 944,000 acres have been sown to this grain. A decrease of 10 per cent of the ten-year average, as 43 per cent of the same date last year. The condition on the same date last year, was 90 per cent.

Soviets Establish Child Clinics

Moscow, Russia.—Special clinics for crippled children are being established by the Soviet Union. The health department estimates from incomplete data that there are 750,000 crippled children in the nation.

## ROYALTY OF SPAIN

Photograph above shows Queen of Spain and her two daughters, Infanta Beatrice and Maria Christina, leaving Westminster Palace, London, England, upon her 42nd birthday.

## Independence For India

Voice Of India Heard At Round Table Conference In London

London, England.—India's round table conference heard a voice from John in a demand for complete independence.

"I do not come to ask for Dominion status," exclaimed Mahatma Gandhi, one of the famous All India brothers and a leader of the All India Muslim League. "I do not believe in the attainment of Dominion status. The one thing to which I am committed is complete independence."

The Hindu and the Moslems alike challenged the Conservative view, expressed by Lord Peel, when the former secretary of state for India declared Dominion status had not been promised as an immediate gift, but had merely been pointed as a goal by the present Viceroy of India, Lord Irwin.

"I want to go back to my own country," Mahatma Gandhi declared, "only if I can go back with the substance of freedom in my hand. Otherwise I will not go back to the slave country. You will have to give me 'grave here.'"

"We will be satisfied with nothing less than full responsible government," insisted Dr. B. S. Mooney, head of the Hindu Mahasabhas, or protection society.

## A NEW FARM POLICY PROPOSED BY GOVERNMENT

Toronto, Ont.—A Dominion agricultural policy is proclaimed in the report of the Dominion Minister of Agriculture, on the occasion of the opening of the Royal Winter Fair.

The report contains many important policies, adopted after three days' deliberation of the provincial ministers of agriculture and to be known as the "National agricultural policy."

Declaring that at the present time of depression new and drastic steps in the right direction should be taken, and insisting on the necessity of co-operation throughout agricultural Canada, the minister introduced four measures designed to remedy the situation and bolster "Canada's strength for better feeding purposes."

1. The introduction of better blood in herds.

2. The scientific use of home grown products for herd feeding purposes.

3. Careful study of the science of animal husbandry and the prevention of implantation and spread of poultry diseases.

One of his ambitions and reiterated policies said Mr. Weir, was to find some machinery by which every farmer throughout the country could be made aware of the changes in agricultural methods and of the improvement in farming conditions. This he proposed to do by the holding of the conference with provincial agricultural leaders.

"It has been agreed that the provincial departments of agriculture and all the machinery at their service, will transmit and interpret to the farmers of Canada every possible advance or policy which the Dominion Department of Agriculture, after consideration and consultation, will consider beneficial to the farming population as a whole. This, of course, with the least possible delay and at the lowest cost.

Decrease in the cost of production and scientific production—that is the production of market requirements—were two fundamental principles that had not been lost sight of.

The minister made a brief analysis of his four major propositions. Considering the difficulty the average farmer experiences in securing the first class sire, whereby he might improve the blood of his cattle and the general usefulness of his stock, Mr. Weir undertook to supply free of cost to any group of energetic and deserving farmers a sire to be used in the next two years. This, he thought, would eliminate expense, and a useless waste of time and energy and encourage one of the more necessary and wholesome steps in the raising of profitable and sound stock.

In view of present conditions, the minister foresaw a very definite increase in pork production during the next few years. "This he did not view, but felt that because of the inevitable trend, steps should be taken to direct that increased production. In his opinion this would be best done by supplying farmers with breed sows of the fine bacon type at cost and at half transportation price. This would eventually mean that the right quality of bacon could be procured for home consumption and exportation with substantial remuneration for the farmer."

## UNEMPLOYMENT INSURANCE PLAN WAITS ON CENSUS

Toronto, Ont.—The Dominion Government awaits the completion of the 1931 census before it will apply itself to the question of national unemployment insurance. Premier Robertson, Federal Minister of Labor, intimated in an address to the Ontario council on unemployment.

Senator Robertson said from seven to ten of the questions to be asked for all citizens in the census next June will deal with employment and unemployment. It was hoped, he said, in this way to gain a complete picture of the situation at a more normal season of the year than now.

Senator Robertson believed that, with the end of Soviet Russia's attempt to disorganize the markets of the world, economic conditions would begin improving almost overnight.

"As a result of the war, it is my belief that this latest attempt to Communize the world has failed, then almost immediately a new era of recovery of trade, a restoration of confidence, with conditions restored, credit conditions will improve and more credit means more employment. It is my belief that this latest attempt to Communize the world has failed, then almost immediately a new era of recovery of trade, a restoration of confidence, with conditions restored, credit conditions will improve and more credit means more employment."

The speaker gave a detailed account of the government's \$20,000,000 unemployment relief plan. So far, with the provinces and the municipalities co-operating, there was \$400,000,000 of government or municipal work under way or being started to relieve unemployment, and \$20,000,000 of government work or being started by the railways.

Hon. Dr. J. D. Monteith, Minister of Labor and Public Works, said that the government was most optimistic about the return of prosperity. "There will be a restoration next spring or summer," he said. "You will see it in the eyes of the people. The province as a whole has greatly improved. The depression has lifted and we are looking forward to a restoration of better times."

## Will Be Shipped To England

Alberta Breed, Mare From Prince Of Wales Ranch Sold To Yorkshire, Man.

Toronto, Ont.—Owned by the Prince of Wales, and born on his ranch at Pekisko, Alberta, a six-year-old Percheron mare and her foal, now at the Royal Winter Fair, are going to make history in Canadian horse-dom. "Princeton Carmain," winner of many titles in the Percheron class throughout the west, and her colt, "Princeton Carmain," have been sold to Lord Middleton for an undisclosed sum and will sail Tuesday, Nov. 25, from Montreal for his farm at Malton, in Yorkshire, England. W. L. Carter, manager of the E.F. ranch, said recently.

Thousands of purebred horses have been shipped to Canada from England, to improve Canadian stock. Mr. Carlyle believes that this is the first instance of blooded Canadian horses being shipped to England, the home of fine Percherons.

Premiers Visit Edinburgh

Edinburgh, Scotland.—Three Empire prime ministers: Rt. Hon. R. B. Bennett, of Canada; Rt. Hon. J. Bennett, of Australia, and Rt. Hon. G. S. Forbes, of New Zealand, spent a day in Edinburgh. After a visit to the Scottish National War Memorial in Edinburgh Castle, where each had wreaths, they received the freedom of the city at Usher Hall.

Would Conserve High Incomes

Vancouver, B.C.—Conservation of all incomes in excess of \$50,000 a year, or a solution for the nation's unemployment problem was urged by delegates to the regular meeting of the Vancouver, New Westminster and Victoria Labor Councils, in a resolution addressed to the Federal and Provincial Governments.

Heavier Imports Of Salmon

London, England.—Imports of canned salmon from Canada during the first ten months of the year were higher than in 1929, while salmon imports from Russia declined heavily in the same period. Mr. Hon. William Graham, president of the Board of Trade, told the House of Commons.

West Is Optimistic

Ottawa, Ont.—Returning from a trip to the Pacific coast, Hon. Alfred Oulmont, Minister of the Interior, expressed sentiments of great confidence in the future of the west, particularly of British Columbia. The west was optimistic despite the present depression, he said.

## CHAMPION CHATTER

Fridays and Saturdays.

## First Rate Hotels or Poor Stopping Places

Under the Present Liquor Act of Alberta there is the closest supervision of all the licensed hotels and a plan of continued improvement of the operation of Hotels is possible only under the Act as it now stands.

The Commissioner says who shall run the licensed hotels and the Liquor Board inspectors exercise the closest supervision, demanding as the licensee's funds permit, better equipment and better service to the public.

What a difference when compared with Prohibition days! No supervision, poor furnishings, poor table No control whatsoever.

DO NOT SIGN THE PROHIBITION PETITION. IT MEANS CLOSING CLUBS AS WELL AS BEER ROOMS.

Leave the Act alone. We don't want the bootlegger back again.

Moderation League of Alberta, Inc.
